

Halton-Hamilton Source Protection Committee

Carla Coveart

Member-at-Large

Carla Coveart represents the interests of the general public on the Halton-Hamilton Source Protection Committee. Ms. Coveart is a resident of Hamilton and works as a Professional Engineer at a local municipal consulting firm. She has six years of experience providing detailed engineering design of wastewater infrastructure, hydraulic and hydrologic modelling, asset management, municipal drainage, extraneous flow removal on municipal and private property for basement flooding mitigation, construction inspection for linear and vertical infrastructure, condition assessments, rehabilitation, and unique environmental investigations including odour investigations and contaminant source tracking. Her insights into municipal infrastructure concerns and her desire to protect Lake Ontario and Hamilton's water resources will assist the Source Protection Committee with an improved understanding and policy development
