GW: Groundwater
 WHPA-A-10: Wellhead Protection Area A - Vulnerability Score of 10
 Reference: Prescribed threat circumstances as listed in the Ministry of the Environment Table of Drinking Water Threats (2009)
 Source: Conservation Halton
 Date: April 2015
 Projection: UTM NAD 83 Zone 17

The application of commercial fertilizer can be a significant drinking water threat only if carried out in a vulnerable area that exceeds threshold values of percent managed land and livestock density (refer to Assessment Report maps).
