Subject: Updates to the Director's Technical Rules for Source Protection Plans

SENT ON BEHALF OF KIRSTEN CORRIGAL, DIRECTOR, CONSERVATION AND SOURCE PROTECTION BRANCH

Good Day All:

I am pleased to share that the Ministry of the Environment, Conservation and Parks has posted a policy decision on the Environmental Registry of Ontario updating the technical rules for assessing source protection vulnerability and risks under the *Clean Water Act, 2006*.

These updates will help ensure that source protection efforts are supported by current science and that the quality of Ontario's drinking water continues to be protected, as committed to in the Made-in-Ontario Environment Plan.

Many of you had the opportunity to provide input on these updates through working groups and interactive sessions held in 2019 and 2020, as well through the proposal on the Environmental Registry. I would like to thank you for your constructive feedback and contributions, which have been invaluable in developing and refining the updates.

The updated technical rules are posted to the Environmental Registry of Ontario (English: <https://ero.ontario.ca/notice/019-2219>; French: <https://ero.ontario.ca/fr/notice/019-2219>).

Attached to this email is a tracked-change version of the updates to the Director's Technical Rules.

If you have any questions on the technical rules, please contact your Liaison Officer and George Jacoub, Technical Expert at George.Jacoub@Ontario.ca.

Kirsten Corrigan, Director
Conservation and Source Protection Branch
